NEPAL INDO POWER TRADING
PVT. LTD.

ELECTRICITY TRADING · NEPAL

From rivers to markets

Connecting Nepal's hydropower producers with electricity buyers at home and across the border.

An Aviyan Group company

WHO WE ARE

Company overview

Nepal Indo Power Trading Pvt. Ltd. is proposed as an independent private electricity trading company in Nepal, focusing on domestic electricity trading and cross-border electricity trade with India and Bangladesh, subject to applicable government licences and regulatory approvals.

OUR PURPOSE

Connect Nepal's hydropower producers with electricity buyers at home and in India.

PROCESS

How a trade takes shape

1. Understand seasonal supply.
2. Match generation with demand.
3. Agree on delivery and terms.

WHAT WE WILL DO

Business objectives

- Purchase electricity from hydropower and renewable energy producers.
- Supply electricity to eligible industries and commercial consumers in Nepal.
- Facilitate electricity exports to India and Bangladesh, subject to approvals.
- Explore electricity import opportunities during Nepal's dry season.
- Develop partnerships with power producers, buyers and international energy companies.

MARKET OPPORTUNITIES

Nepal's growing hydropower generation capacity and seasonal electricity surplus create opportunities for domestic and cross-border electricity trading. **India is the primary target market**, while **Bangladesh** offers additional long-term growth potential.

WHERE WE PLAY

Market focus

Domestic supply | Primary target market | Long-term growth

01

Domestic supply

Explore opportunities with industrial and utility buyers.

02

Nepal–India trade

Develop cross-border trading partnerships.

WHO WE WORK WITH

Partnerships

Hydropower producers | Electricity buyers | Trading partners

POLICY LANDSCAPE

Recent government and ministry initiatives

Private-sector participation OCT 2026

In October 2026, the Ministry of Energy, Water Resources and Irrigation initiated a Letter of Intent (LOI) process for prospective private companies interested in cross-border electricity trading. The process is intended to allow preparatory activities such as market research, feasibility studies and discussions with potential partners.

Electricity Act reform

The government has been pursuing amendments to the Electricity Act, 2049 to establish a clearer legal framework for private-sector participation in electricity trading. The final legal and licensing framework remains subject to completion of the required legislative process.

Regional electricity trade

Nepal continues to pursue expanded cross-border electricity trade infrastructure and market access with India, while developing the framework for electricity exports to Bangladesh through India's transmission network.

LOOKING AHEAD

Future business plan

The company aims to gradually expand its trading activities, establish partnerships with domestic power producers and authorised international trading companies, and develop a sustainable presence in the regional electricity market.

COMPLIANCE

Regulatory requirements

The company will obtain all necessary government permissions, electricity trading licences, regulatory approvals and cross-border trading arrangements before commencing commercial operations.

VISION

To become a reliable and competitive electricity trading company connecting Nepal's hydropower resources with domestic and international energy markets.
